

CRISIS OF MUSLIM NATION

The whole society is occupied by the formal, nominal, partial matters and dissimilarity, disputes are in papers, books, broadcast and spatial channels. This consumes time, minds and resources of nation. They neglect essential matters, like how can the Islamic nation break the blockade made by disbelieving nations to make it a backward, low and reactionary nation, this is the greatest calamity we suffer now and they frankly threaten us by this.

When Pakistan released its five atomic bombs, Bush said to the president of Pakistan: "Stop the atomic experiments." He said: "I can't stop unless India stops." He said: "Stop or I'll return you to the Stone Age." i.e. prevent you from all kinds of technology.

Look at the threatening and see to what extent it reached. Why do we wait to be like this? We wait to take weapons from an enemy whom we fight. Will he do this? Will he give us weapons from there to fight the Jew? Never. In our land we can't even extract chicks, so we import them from there, we can't also create the best species of animals but we also import them from there, what are the consequences?

They made means of destruction in these things; you see this from time to time, there is a plague spread coming from Israel or any other place. Two years ago, they gave us bees saying that it is a developed species, but there was a plague in it destroyed lots of our species while we are inattentive. There is also the catastrophe of palm mites which appeared recently and is going to prevail and destroy palm trees in our country and everyone knows where the first diseased species came from. Many times they export to us the pestilence of cows and other diseases and when the disease spread they say they have the medicine, although these medicines we get from them have poisonous materials.

It is scientifically proved and announced that the medicine even in Germany and this is an official reportage

announced in the German papers said that the medicine made for the German and the western peoples differs from that which is made for the Arabs and the Eastern peoples. What do we wait for after that? Like the medicine, the same thing happens with machines and other things we use, now they even refuse to export to us modern technology in many industries and fields of research, they only sell us what they no longer use in their factories and laboratories.

Unfortunately, we are happy and buy them because they are cheap; the press here announced that in a famous port in a big Arab country, they found imported used laboratory analysis equipments, by initial analysis they found the virus of AIDS in them, although they are equipments for analysis going to an Islamic country and they will be used by doctors. See how are they doing to us? Because we import everything.
