

Where is God?

Whoever contemplates how the universe was formed and the laws running it, the human body and the facts inside it, he will realize that this universe was formed in a way that makes it perfectly suitable for the existence of life and people.

The universe requires accurate adjustment for millions of steady facts and universal phenomena because any defect in those facts won't allow this universe or life on it to be stable. The natural features of the earth were set accurately to match the requirements of continuity of life and the existence of man.

The establishment of the universe and the earth, to be suitable for life and man, requires that God must be acquainted with the sustenance of His deeds and the continuity of His characteristics in everything inside or around us from God's innovation and its permanency in life. God is always there by His deeds' qualities, the facts of His ability and His clear will about everything we see inside or around us, God says:

**41:53. "Soon will We show them our Signs in the (furthest)regions (of the earth), and in their own souls, until it becomes manifest to them that this is the Truth."**

If you ask: where (is God), this question is about the place, and He is above place and capability because He is the Creator of place. If you say: in, it is for the time and He is before and after time as He is the Creator of time and place. If you say: before, He is before the before and nothing was there before Him. If you say: after, He is after the after and nothing will be there after Him. Every thought comes to your mind has an end and God is different from this because He is perfect.
